

CURRICULUM FOR EXCELLENCE

Interdisciplinary Learning: S2 Data Analysis Project

Mathematics and Physical education collaborate on a joint co-planned co-delivered project for S1/S2 students. In Mathematics S2 students have opportunity to analyze and compare personal data with raw data gathered during the Physical Education Athletics course in S1 and S2. Pupils use IT to calculate mean, median, mode and range and can make comparisons between classes and/or their year S1 and S2.
