

CURRICULUM FOR EXCELLENCE

Interdisciplinary Learning: Eco

In March, several departments participated in an Eco Theme. This involved special assemblies run by young people which highlighted various aspects of waste awareness.

Over several years, pupils in Maths, Computing and English investigated and researched global or local examples of tackling recycling and waste. Materials were displayed around the school relating to curriculum activity. A large “Waste Collage” was created over lunchtime and displayed in the English Corridor; graphs and tables were displayed in Maths; food miles built on the contributions of staff from around the school.

In 2013 our focus is on the Grounds of the School. The Environmental Audit encourages direct action by several departments. All departments will contribute to outcomes and experiences which relate to improving the physical environs of the school.
