

CURRICULUM FOR EXCELLENCE

Interdisciplinary Learning: Fair Trade Project

Several departments worked together on a Fair Trade Project for S1. This involved a suspended timetable for a half day. Pupils explored Fair Trade through a variety of activities using ICT, role play games, foreign languages and practical skills. They had the opportunity to present their understanding for Fair Trade around the world, in different ways.

This is an innovative approach to Global Education in the school involving staff from Home Economics, Business Studies, Modern Languages and Technical departments.
